Oligopeptidase B (BC 3.4.21.83) [imported] - Salmonella enterica subsp. enterica serova
Cispecies: Salmonella enterica subsp. enterica serova Typhi
A;Note: this species has also been called Salmonella typhi
C;Date: 09-Nov-2001 #sequence_revision 09-Nov-2001 #text_change 18-Nov-2002
C;Accession: ACOT41

probable peptide synthetase - Aureobasidium pullulans
C;Species: Aureobasidium pullulans
C;Date: 02-Sep-2000 #sequence_revision 02-Sep-2000 #text_change 09-Jul-2004
C;Accession: T30192
R;Peery, R.B.; Thornewell, S.J.; Tobin, M.B.; Skatrud, P.L.
submitted to the EMBL Data Library, January 1997
A;Description: Discovery of an MDR-like gene adjacent to a peptide synthetase in Aureob
A;Reference number: Z20767
A;Accession: T30192
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Residues: DNA
A;Residues: L-10797 APES

A; Molecule type: DNA
A; Residues: 1-58 <hr/>
A; Cross-references: UNIPROT:P11786; UNIPARC:UPI0000175A39; EMBL:X13580
A; Genetics:
A; Gene: amy2
A; Map position: 7A
A; Introns: 29/3
C; Function:
A; Description: catalyzes the hydrolysis of internal 1,4-alpha-D-glucosidic bonds
A; Backway: glycogen/starch degradation
C; Superfamily: alpha-amylase, plant type; alpha-amylase core homology
C; Keywords: glycosidase; hydrolase; polysaccharide degradation
                                                                                                                                                                                                                                                                                                                                                                                                                    0; Gaps

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Issued Patents AA:*

i Sequence 1425, Application US/09962756

j Patent No. 6875741

i GENERAL INFORMATION:

APPLICANT: PILLUTLA, RENUKA

APPLICANT: BLINE, ARTHUR J.

APPLICANT: SCHAFFER, LANGE

APPLICANT: GCLOSTEIN, NEIL I.

APPLICANT: GCLOSTEIN, NEIL I.

APPLICANT: GSTEKCARD, SORRN

APPLICANT: OSTEKCARD, SORRN

APPLICANT: GSTEKCARD, SORRN

APPLICANT: HANSEN, PER HERTZ

TITLE OF INVENTION: INSULIN AND IGF-1 RECEPTOR AGONISTS

FILE REFERENCE: 1878-4051051

CURRENT APPLICATION NUMBER: US/09/962,756

CURRENT FILING DATE: 2010-09-24

PRIOR FILING DATE: 2000-03-29

PRIOR PILING DATE: 1998-09-24

PRIOR FILING DATE: 1998-09-24

NUMBER OF SEQ ID NOS: 2227

Patent No. 6610836

GENERAL INFORMATION:
APPLICANT: Gary Breton et. al

APPLICANTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA

TITLE OF INVENTION: PREUMONIAE FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 2709.2004001

CURRENT PELLING DATE: 2000-01-27

PRIOR APPLICATION NUMBER: US 60/117,747

PRIOR APPLICATION NUMBER: US 60/117,747

RIOR APPLICATION NUMBER: 1999-01-29

NUMBER OF SEQ ID NOS: 14342

LENGTH: 382

LENGTH: 382
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ö

Patent No. 6747137

Patent No. 6747137

RENEMAL INFORMATION:

APPLICANT: Keith Weinstock et al

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO CANDIDA ALBICA:

TITLE OF INVENTION: VUCLEIC ACID AND THERAPEUTICS

TITLE OF INVENTION: 107196.132

CURRENT APPLICATION NUMBER: US 60/074,725

PRIOR FILING DATE: 1998-02-13

PRIOR FILING DATE: 1998-02-13

PRIOR FILING DATE: 1998-08-13

PRIOR FILING DATE: 1998-08-13

NUMBER OF SEQ ID NOS: 28208
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                US-09-270-767-60895

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-09-740-002-23

Sequence 23, Application US/09740002

Patent No. 6237809

GENERAL INFORMATION:
APPLICANT: BRAMS, PETER
APPLICANT: MORROW, PHILLIP

TITLE OF INVENTION: NEUTRALIZING HIGH AFFINITY HUMAN MONOCLONAL ANTIBODIES
                                                   APPLICANT: Liang, Jihong
APPLICANT: Liang, Jihong
APPLICANT: Mittanck Cindy A.
APPLICANT: Mittanck Cindy A.
APPLICANT: Mu, Yonnie S.
TITLE OF INVENTION: Anti-fungal Proteins and Methods for Their Use
FILE REFERENCE: 38-21(15036)B
CURRENT APPLICATION NUMBER: US/09/732,210
CURRENT APPLICATION NUMBER: US/01/69,513
PRIOR APPLICATION NUMBER: US 60/169,513
PRIOR APPLICATION NUMBER: US 60/169,340
PRIOR PILING DATE: 1999-12-07
PRIOR APPLICATION NUMBER: US 60/169,340
PRIOR PILING DATE: 1999-12-07
SEQ ID NO 338
SEQ ID NO 338
LENGTH: 78
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 346, Application US/09732210

Sequence 56330, Application US/09270767

Patent No. 6703491

GENERAL INFORMATION:
APPLICANT: Homburger et al.
TITLE OF INVENTION: Nucleic acids and proteins of Drosophila melanogaster;
FILE REFERENCE: File Reference: 7326-094
CURRENT APPLICATION NUMBER: US/09/270,767
CURRENT FILING DATE: 1999-03-17
NUMBER OF SEQ ID NOS: 62517
SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RESULT 12

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 2, Application US/10427442

Patent No. 6860704

GENERAL INFORMATION:

APPLICANT: Falco, Carl

APPLICANT: Falco, Carl

APPLICANT: Famedu, Omolayo O.

APPLICANT: Famedu, Antoni

TITLE OF INVENTION: Phosphatidylcholine Biosynthetic Enzyme
FILE REFERENCE: BB1403 US NA

CURRENT APPLICATION NUMBER: US/10/427,442

CURRENT APPLICATION NUMBER: US/09/668,262A

PRIOR APPLICATION NUMBER: US/09/668,262A

PRIOR APPLICATION NUMBER: 00/155626

PRIOR PRILING DATE: 2000-09-22

PRIOR PILING DATE: 1999-09-23

NUMBER OF SEQ ID NOS: 20

SOFTWARE: Microsoft Office 95

SEQ ID NO 2

LENGTH: 157

Sequence 31, Application US/09216393B

Patent No. 6514694

GENERAL INFORMATION:
APPLICANT: Milhausen, Michael James
TILE POINTENTION: TOXOPLASMA GONDII PROTEINS, NUCLEIC ACID MOLECULES, AND USES THE FILE REPRENCE: TX.1-C.2
CURRENT APPLICATION NUMBER: US/09/216,393B

CURRENT PILING DATE: 1998-12-18
PRIOR FILING DATE: 1997-12-19
NUMBER: OSEQ ID NOS: 366
SOFTWARE: Patentin version 3.1
SEQ ID NO 31

Batent No. 6562958

GENERAL INFORMATION:
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
TITLE REFERENCE: GTC99-03PA
CURRENT APPLICATION NUMBER: US/09/328,352
CURRENT FILING DATE: 1999-66-04
NUMBER OF SEQ ID NOS: 8252
LENGTH: 301
